

Network Partners Fact Sheet

The Cooperative Ecosystem Studies Units (CESU) Network is a national consortium of federal agencies, academic institutions, tribal, state, and local governments, nongovernmental organizations, and other partners working together to support informed public trust resource stewardship. Structured as working collaboratives, the 17 CESUs represent biogeographic regions encompassing all 50 states, the District of Columbia, and U.S. insular

areas. CESUs bring together scientists, resource managers, educators, students, and other conservation professionals, drawing upon expertise across the biological, physical, social, cultural, and engineering disciplines (from Anthropology to Zoology) to conduct collaborative and interdisciplinary applied projects that address long-standing and emerging natural and cultural heritage resource issues at multiple scales and in an ecosystem context.
