## Regional Economic Impact Analysis of the American Recovery and Reinvestment Act – US Army Corps of Engineers

5th Interagency Social Science Roundtable Institute of Water Resources, U.S. Army Corps of Engineers Alexandria VA, January 10, 2011

### **American Recovery and Reinvestment Act**

- The American Recovery and Reinvestment Act (ARRA) of 2009 (Public Law 1115-5) was enacted by Congress in February 2009
- ARRA appropriated \$787 billion for the purpose of creating employment, promoting infrastructure investment, and catalyzing consumer spending
- Designed to focus on projects that were "shovel ready"

## **USACE ARRA Projects**

- USACE was allocated \$4.6 billion for a broad spectrum of activities that affect six of the eight business lines managed by USACE
- Total number of funded projects is 2,960
- Navigation and Flood Risk Management projects account for largest share of funded projects

## **RECONS-**

### (Regional ECONomic System)

The U.S. Army Corps of Engineers, Institute for Water Resources contracted with the Louis Berger Group to develop an economic impact tool to :

- provide accurate and defensible estimates of regional and national jobs creation and retention and other economic measures
- document the performance of direct investment spending of the USACE as directed by the American Recovery and Reinvestment Act (ARRA)
- to evaluate Civil Works Budget and other nonfederal spending activities related with USA infrastructure and programs

## **USACE ARRA Projects**

| <b>Business Line</b>           | Total Value     |
|--------------------------------|-----------------|
| Navigation                     | \$1,770 million |
| Flood Risk Management          | \$1,400 million |
| Environment (including FUSRAP) | \$771 million   |
| Hydropower                     | \$314 million   |
| Recreation                     | \$311 million   |
| Water Supply                   | \$.7 million    |
| Regulatory Program             | \$24.9 million  |
| Emergency Management           | NA              |
| Expenses                       | \$6.6 million   |
| Total                          | \$4,600 million |

### Approach for Evaluating ARRA Project Impacts

**Business Line Work Activities** 

**Expenditure by Work Activities** 

Navigation, Hydropower, Environmental, Flood Risk, Emergency Management, Regulatory, Recreation, Water Storage

Dredging, Lock Construction, Levee Repair, Investigations

**Spending Profile** 

Labor, Materials, Equipment, Fuel, Services and Other Expenditures

> IMPLAN Industry Multipliers (Region, State, Nation)

Direct, Indirect and Induced Effects Measured as Jobs, Earnings, Output (Sales), and Valued Added (GDP)

**Impact Areas and Multipliers** 

**Economic Impacts** 

**BUILDING STRONG**<sub>®</sub>

## Identifying ARRA Work Activities

- Work activities were initially identified by the ARRA project descriptions and ARRA project and business line research
- All ARRA budget line items were associated with a work activity or multiple work activities
- A total of 134 work activities have been identified with ARRA budget line items
  - Includes 45 purchasing and 21 dredging work activities

**Wilmington District** 

## **ARRA Impact Regions**

- CE projects were identified with one or multiple impact regions- more than 1,200 regional economic models were developed for Corps project locations and are available in RECONS
- Types of local/regional impact regions for ARRA spending alone:
  - Metropolitan (county or multi-county) -- 409
  - Micropolitan (county or multi-county) -- 345
  - Rural FEAs -- 197
  - Large-scale -- 42
- 50 state and 98 multi-state impact regions

 $\textbf{BUILDING STRONG}_{\texttt{B}}$ 

## Conclusions

- Regional economic impact approach provides a reasonable estimate of ARRA impacts
- RECONS provides convenient approach to analyzing large number of projects over numerous geographical impact areas
- Similar approach can be used to evaluate regional impacts of government programs and projects
